

VLCP8B service note: 100-1 Repeat function does not work

When operating the configuration software on computer there is a mistake in text for transmit mode.

For repeat mode (typically volume control) select transmit mode "Sequential"

Sequential will send codes repeatedly as long as bottoms is pressed.

There are only two transmit options:

- Repeat (via Sequential select)
- Simultaneous

The screenshot shows the 'Program Button set' window. The 'Transmit mode' dropdown is highlighted with a yellow box. It shows 'Repeat (?)' selected, with 'Sequential (?)' and 'Simultaneous (?)' also visible. Arrows point from 'Repeat' and 'Simultaneous' labels to their respective radio buttons.

Command	Control Type	Device	Brand	Model	Function
<input checked="" type="checkbox"/> 1	RS232	Amplifier	Select	Select	
<input checked="" type="checkbox"/> 2	RS232	Amplifier	Select	Select	
<input type="checkbox"/> 3	RS-232	Select			
<input type="checkbox"/> 4	RS-232	Select			
<input type="checkbox"/> 5	RS-232	Select
