

GCS22U

2-Port USB KVM Switch with Cables and Remote

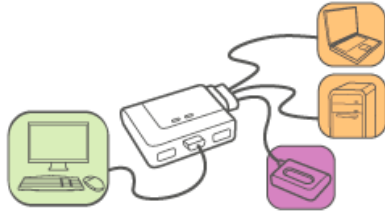

The IOGEAR 2-Port USB Cable KVM allows users to share a VGA monitor, a USB mouse, and a USB keyboard between two computers. Users can switch between computers using the wired remote switch button that can be placed on your desk for convenience. It offers an out-of-box solution with no additional cables needed. It supports multiple operating systems including Windows, Sun, and Mac. It is entirely plug-n-play and requires no software to run. It is powered through the USB bus and thus does not require a power supply to run. This 2-port KVM also offers a cost effective solution to increase security by allowing users to switch between the Internet connected PC and an Intranet connected PC, a way to boost Internet security. It is the ideal KVM for those who want a competitively priced, entry level KVM that will allow them to multitask with two computers at their disposal.

- One USB keyboard, USB mouse, and VGA monitor control two computers
- Separate the Internet and Intranet with the click of a button
- Max resolution: 2048 x 1536, DDC2B
- Plug-n-Play monitor support
- Molded-in cables to simplify setup
- Compact design features two attached KVM (USB and VGA) cables
- Compatible with PC, MAC and SUN operating platforms
- Supports Windows 2000 or higher, Mac OS 9.0 or higher, Sun Solaris 9 or higher
- No software drivers required – simply connect the cables to the computers
- Computer selection via 6 ft remote controller cable that can be placed on your desk for easy reach
- Mac keyboard support
- Supports programmable mice
- No power adapter required
- 3 Year Limited Warranty

How does it work?

- Connect your monitor, keyboard and mouse to the KVM
- Connect the KVM USB cables to each computer
- Press the button on the remote controller to switch computers
