# 4-Port USB 2.0 Automatic Printer Switch

IOGEAR's USB 2.0 Automatic Printer Switch allows four PCs and / or Macs to share one printer or multi-function printer. Simply submit a print job and the printer automatically* switches to the preferred computer. The switch also enables four computers to easily share one external hard drive, scanner, or any USB device. No more plugging and unplugging between computers.
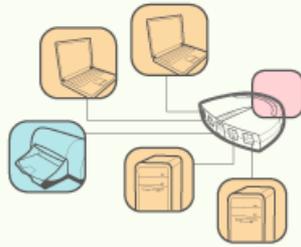

* Automatic switch function is software based and only available with USB printer or the printer function of a multi-function printer. For connecting and using other types of USB devices, you can switch by using the push-button on the USB switch or with the included software.

- Automatically* switch from one computer to another when connecting to a USB printer or multi-function printer
- Easily share a USB 2.0 device between PC and Mac without a network setup
- Simply press a button to switch a USB device between computers - No software installation required

- Active-port LED lights indicate which computer has access to the USB device
- Switch-lock function prevents other users from switching the USB device and ensures data access consistency
- USB 2.0 support with data transfer rate up to 480Mbps and USB 1.1 backward compatible
- No external power supply needed

## How does it work?

- Connect your USB device (i.e. printer, external hard drive, or scanner) to the USB-A connector
- Connect your computers (PC or Mac) to the USB-B connector
- Simply push the button to swap or enable automatic* switch between four computers
