

## Wireless Presenter

With a Gearlab® Wireless Presenter, you can focus the attention on delivering your presentation with ease and confidence thanks to the laser pointer and intuitive three-button design.

While presenting, the sleek design feels natural and comfortable in your hand, and the presenter takes up almost no space in your bag while travelling between presentations.

The 2.4 GHz wireless USB Nano receiver allows you to navigate a slideshow from a distance of up to 15 metres. Between presentations, you store the USB receiver inside the battery compartment of the presenter so it never gets lost.
