Abstract

As DataCite's Technical Director I am very excited to announce that DataCite is looking for an application developer to strengthen our technical team. Working for DataCite is an opportunity to work on interesting development work around scholarly infrastructure and data citation. We are a small team, which requires flexibility, but it is a chance to work on a broad range of topics, from frontend development to DevOps work.

Keywords

Information Systems (Subfield)

As DataCite's Technical Director I am very excited to announce that DataCite is looking for an application developer to strengthen our technical team. Working for DataCite is an opportunity to work on interesting development work around scholarly infrastructure and data citation. We are a small team, which requires flexibility, but it is a chance to work on a broad range of topics, from frontend development to DevOps work.

We are particularly interested in candidates with a strong Open Science background. Remote work (from somewhere in Europe) is possible.

Please take a look at the job posting for more information and contact me by April 17th if you are interested in the position.
