Abstract

As DataCite's Technical Director I am very excited to announce that DataCite is looking for another application developer to strengthen our team. This is an opportunity to work on interesting development work around scholarly infrastructure with a focus on research data. You would join a small technical team of one application developer based in Berlin and me based in Hannover, also in Germany.

Keywords

Information Systems (Subfield)

As DataCite's Technical Director I am very excited to announce that DataCite is looking for another application developer to strengthen our team. This is an opportunity to work on interesting development work around scholarly infrastructure with a focus on research data. You would join a small technical team of one application developer based in Berlin and me based in Hannover, also in Germany.

We are particularly interested in candidates with experience in frontend development work, and with a strong Open Science background. Remote work (from somewhere in Europe) is possible.

Please take a look at the job posting for more information and contact me by August 30 if you are interested in the position.
